- Becoming an influential leader

How Working Men and Women Become Successful: Gender Similarities and Differences

While the majority of individuals may believe men and women's success paths are very different, this workshop focuses on what men and women can learn from each other. Based on Dr. Miller Burke's research and her research subject's specific advice and guidance, it demonstrates that there are more similarities than differences between successful men and women and both genders can learn from each other. This keynote focuses on:

- Enhancing critical personality characteristics
- Improving your work style – your brand
- Increasing your daily resilience
- Overcoming common obstacles to success
- Gender related obstacles
- Developing social influence skills
- Becoming a better leader

Career Obstacles For Women: Past Trauma and Current Sexism

While there are many similarities between successful women and men, women face unique obstacles in reaching professional and financial success. Based on recent research of over 100 self-made female millionaires, results demonstrate success for women is impacted by: shouldering the majority of child and household care, sexism at work, impact of childhood trauma, and stereotypes about leadership. Senior-level executives can also clearly communicate the obstacles they have witnessed for women on their pathway to success. This keynote helps participants:

- Identify common career obstacles for women
- Understand how past childhood trauma affects women's work styles
- Recognize her own triggers that limit your success
- Learn about strategies utilized by "millionaire" women to achieve personal and work success
- Create her personal plan for personal and work place success

Childhood Trauma and The Impact On Adult Work Life

It should not be a surprise that adults are impacted by their childhood adversity. Social science research clearly demonstrates bad childhood experiences impact one's adult personal and work life – from anxiety, depression, anger management and more. This keynote helps the participant in:

- Understanding work style patterns for men and women if they grew up in a family with adversity
- Gaining insight into how one's childhood experiences can affect work style and leadership as an adult
- Recognizing career obstacles as a result of adversity
- Recognizing and planning for one's own specific work triggers that increase the likelihood of immature behaviors
- Practicing compassionate accountability as a leader
